

# Proxim Wireless Statement on Restriction on the use of certain Hazardous Substances, EU Directive 2002/95/EC RoHS

---

## INTRODUCTION

Proxim Wireless is actively working with suppliers and manufacturing partners to ensure products fully comply with the European Union Directive 2002/95/EC on the Restriction of the use of certain Hazardous Substances (RoHS) before the latest July 1, 2006 deadline.

Proxim Wireless is fully committed to making the necessary product modifications required for RoHS compliance, as well as collecting all documentation from our suppliers declaring adherence to this Directive.

## STEPS TAKEN

The following Proxim Wireless products are being modified to comply with the restrictions on hazardous substances specified in Article 4 of the RoHS Directive:

- ORiNOCO AP-700, AP-4000, AP-4000M, and AP-4900M.
- All ORiNOCO Client Cards.
- Tsunami MP.11 5054-R and 2454-R.
- Tsunami QuickBridge.11 5054-R and 2454-R.
- All product accessories sold by Proxim for use with the above items, including power injectors, antennas, and cables.
- All new products currently under development.

## NEXT STEPS

Proxim Wireless will issue a special RoHS label declaring our conformity to the RoHS Directive once suppliers and manufacturing partners complete the modifications and can demonstrate full compliance. The labels will be affixed on the products above, except for some accessories, which may have a different RoHS-compliant label or declaration from our direct suppliers.

Proxim Wireless will collect RoHS Declarations of Conformity (DoC) documents from each of our suppliers and manufacturing partners, and can make these documents available upon request to demonstrate compliance to the Directive as necessary.

The above products have varying schedules for adherence to the RoHS Directive. Proxim Wireless is striving to complete these programs and ship RoHS compliant products at least three months prior to the Directive's July 1, 2006 deadline, with the objective to provide time for the Sales Channel to turn-over inventory at least once in advance of the Directive's deadline.
